

Refill Instructions: Canon BX-3 Cartridges

Procedure:

1. Locate the ball bearing on the reservoir side of the cartridge.
2. Use the Black Tool to push the ball bearing into the cartridge.
3. Inject the ink into the opening where the ball bearing was. Do not over fill.
4. Use a piece of black electrical tape or Scotch tape and tape the opening shut. After waiting 15 minutes, clean the cartridge and reinstall in the printer.
